

Adaptér pro uchycení vodících lišt pro horní frézu

TRTA001

The Triton Router Track Adaptor enables highly accurate straight passes with Triton plunge routers, eliminating the need for a Router table. Features 2-part micro and macro adjustability, allowing for precise router locating on the workpiece. The locking mechanism ensures complete rigidity of the component when in use. Features a chrome-plated base plate that promotes minimal friction properties, allowing for smooth router movement on the workpiece and the track rail.

- Robust chrome-plated base plate mounted to a heavy gauge rigid frame that does not deform when loaded
- Fine adjustment screw and rail-mounting knobs for a larger extension
- Mounting the Triton Precision Plunge Router to a track rail allows for precision straight-line routing
- Compatible with all Triton Precision Plunge Routers
- Compatible with Triton, Festool and Makita track rails

Technické informace

Výška	90 mm
Délka	200 mm
Šířka	210 mm
Hmotnost	1,5 kg

Kompatibilní s

TTS TP	Sada vodících lišt a spojovacích prvků
TTS T1500	Vodící lišta
